TECHNICAL SKILLS

Backend & Version Control: Node.js, Express.js, NestJS, TypeScript, Git, GitHub

Frontend & Mobile: React.js, React Native, Next.js, HTML, CSS, JavaScript (ES6+)

Databases: MongoDB, MySQL, PostgreSQL

Cloud & DevOps: AWS, Docker, CI/CD Pipelines

Blockchain & Storage: Solidity, Hardhat, Hedera Hashgraph, Hedera SDK, IPFS (Pinata, Infura)

Testing & Quality Assurance: Jest, Mocha, Storybook

PROFESSIONAL EXPERIENCE

Full-Stack Engineer — Lendsqr

Full-time | September 2025 - Present

- Contributed the refactor of multiple core applications using Test-Driven Development (TDD), focusing on Savings and Services modules while implementing comprehensive Jest test suites that achieved 90%+ code coverage, significantly improving system maintainability and performance.
- Optimized several modules, enabling accurate interest accrual calculations and seamless transaction visibility, reducing discrepancies by over 90%.

Software Engineer — Descriptomizer

Contract | Mar 2025 – May 2025

- Reduced SQL report generation time by 43% through query optimization and index tuning, cutting processing time from 7 minutes to under 4 minutes.
- Automated site tracking and reporting for 3+ clients using cron jobs and AWS services, saving 6+ engineering hours per week.
- Improved data integrity by resolving 90%+ of client data discrepancies, enabling more accurate multi-client analytics.

Full-Stack Developer — Risidio

Contract | Jan 2025 – May 2025

- Engineered and deployed custom ERC-721 NFT smart contracts on Hedera using Hardhat and Solidity.
- Integrated IPFS (Pinata/Infura) for decentralized metadata storage, NFT minting, and royalty management.
- Developed a robust backend using NestJS, streamlining blockchain integrations for secure asset verification and NFT minting workflows.

Full-Stack Developer — Thiscreet

June 2024 – Present

- Developed and maintained cross-platform mobile applications using React Native and Expo, resulting in a 30% increase in user engagement on Android and iOS.
- Implemented secure authentication and authorization using OAuth 2.0 and JWT, safeguarding sensitive user data and enhancing application security.

Full-Stack Developer — ValueGate Consulting

May 2024 – Aug 2024

- Developed and maintained server-side applications using Node.js and Express.js, ensuring high performance and scalability for enterprise systems.
- Implemented security protocols including JWT authentication, SSL encryption, and Helmet.js to ensure robust data protection.
- Conducted code reviews and contributed to continuous improvement practices, reducing bug reports and improving system architecture.

Frontend Developer — TenthDoc

Mar 2024 – Oct 2024

- Built reusable and scalable React components, improving code modularity and maintainability.
- Integrated frontend applications with backend services via RESTful APIs and optimized application performance through effective state management.

Freelance Full-Stack & Python Developer

Mar 2021 – May 2024

- Developed and deployed scalable MERN stack applications, optimizing MongoDB and MySQL databases with encryption and automated backups.
 - Built automation tools, web scrapers, and real-time data applications, integrating third-party APIs for efficient data processing.
-

Volunteer Experience

Software Engineer — Rondwell

Volunteer | June 2025 – September 2025

- Architected and delivered an event-driven onboarding pipeline across User → Vendor domains using RabbitMQ topic exchanges (publish/consume with durable queues, explicit ack/nack, and idempotency checks) to automatically provision vendor profiles and organizations after role activation, reducing manual operational steps and improving onboarding throughput/reliability.
 - Built a modern, security-forward authentication platform in the User service: OTP registration/login, JWT + refresh-token sessions with hashed token storage and device fingerprints, Google OAuth (Firebase Admin), 2FA TOTP + backup codes, and passkeys/WebAuthn, strengthening account security posture and increasing supported login options without sacrificing UX.
 - Implemented comprehensive test coverage using Jest and Mocha, writing unit and integration tests for authentication flows and message queue handlers, achieving 85%+ coverage and preventing regression bugs in critical user journeys.
-

EDUCATION

Bachelor of Science (B.Sc.) — Electrical & Electronics Engineering

Completed 2024

CERTIFICATIONS

- Web Development Bootcamp — Udemy
 - 100 Days of Code: Python Pro Bootcamp — Udemy
 - AWS Cloud Technical Essentials — Coursera
 - Git and GitHub Bootcamp — Udemy
 - Networking Basics — Cisco Networking Academy
 - Migrating to the AWS Cloud — Coursera
 - MATLAB, SIMULINK & SIMSCAPE Onramp — MathWorks
-

PROJECTS

- Authentication System: Developed a secure authentication system using Passport.js and OAuth 2.0, integrated with a custom backend for managing JWT tokens.
- Real-Time Chat Application: Built a real-time chat application using WebSockets, Node.js, and React.js, enabling seamless communication and storing chat logs in MongoDB.
- Mobile Workout Tracker: Developed a cross-platform mobile application using React Native, integrated with Google Sheets to track and analyze user workouts.
